

**Intrusion Panel  
Integration**

## Unified monitoring of intrusion, video, and access control

Integrate your intrusion alarm system into your overall security operations using a unified platform to protect your assets and resources.

The Genetec intrusion panel integration allows security operators to make decisions based on a complete overview of your security environment. Intrusion panels are integrated within Security Center, the unified platform for access control, video surveillance and license plate recognition. This provides easy and real-time monitoring, better risk evaluation after alarm notifications by linking video to intrusion events and provides a wide scale of remote (disarming) arming options.

Bosch and Genetec deliver integrated solutions for targeted industries that go beyond the highest demand of today to substantially improve levels of security.

### Key benefits

- ▶ Provides greater security oversight and control with intuitive monitoring
- ▶ Helps reduce expenses associated with false alarms with video verification
- ▶ Centrally manage, monitor and update Genetec intrusion panel users with a unified interface
- ▶ Leverage an IP-based networking infrastructure from the intrusion panel to the Genetec system
- ▶ Be notified of intrusion alarms with the Genetec mobile app

# Bosch and Genetec The Power of Unification

Unified approach  
to security

Cloud-ready

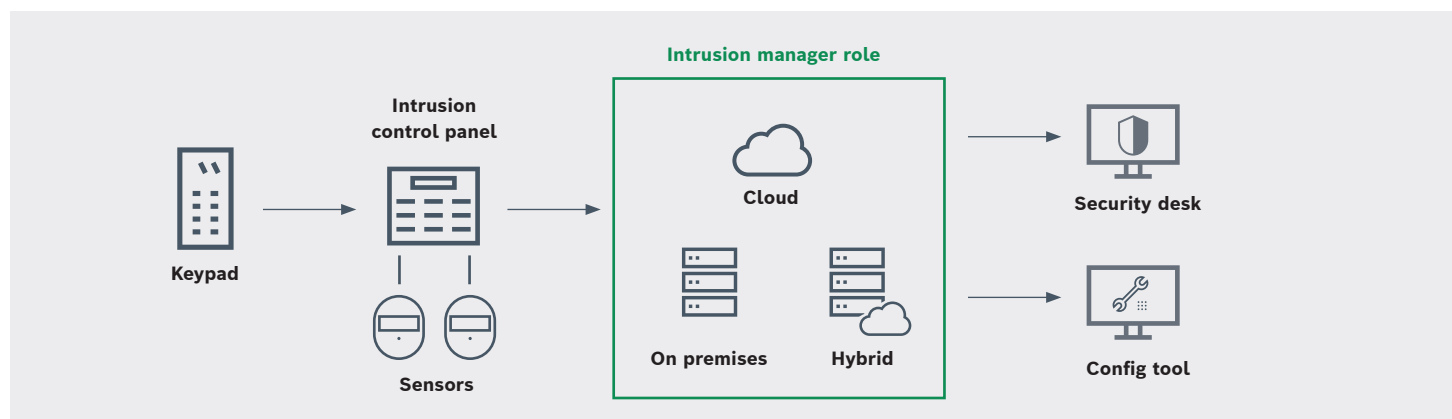

Easy rights  
management

## Other key benefits

- ▶ Federation for centralizing intrusion and security monitoring
- ▶ Real-time status monitoring
- ▶ Advanced arming options
- ▶ Centralized reporting

## Intrusion integration architecture

Intrusion panels connect over an IP network to the Config Tool and Security Desk within Genetec Security Center. Choose from a cloud, on premises or a hybrid approach. You are ensured of easy deployment, reliability, and real-time communications going forward.
