

Stay a step
ahead of
food security.

PROTECT

Seriously protective.

For companies serious about protecting their team, space, and assets, the G Series control panel goes beyond sounding an alarm to next-level security you can feel—day and night. It's your business partner in protection, designed to seamlessly connect and integrate every component of your alarm system with round-the-clock monitoring, instant alerts, and control in the palm of your hand.

From the moment you open your doors to the last person leaving and every hour overnight, the G Series is seriously protective. For safety beyond intrusion, trust beyond compare.

FOOD SECURITY

Keep tabs on all essential appliances.

In the case of electrical failures, schools typically have emergency power generation plans in place.

Our system keeps tabs on all essential appliances and equipment in food service areas, immediately notifying the appropriate facilities personnel so they can respond quickly — minimizing the risk of lost meals.

- Always a chance of appliance failure
- Food loss directly impacts the community
- Immediate notification = food security
